

Intelligent living,
beautifully connected.

ora-smart.com

ORA is built on a simple conviction: the best technology disappears. KNX gives the home an open, wired standard that answers instantly and endures for decades – independent of the cloud, immune to obsolescence. Onto that backbone we design controls refined until only the essential remains. Intelligence, expressed as calm.

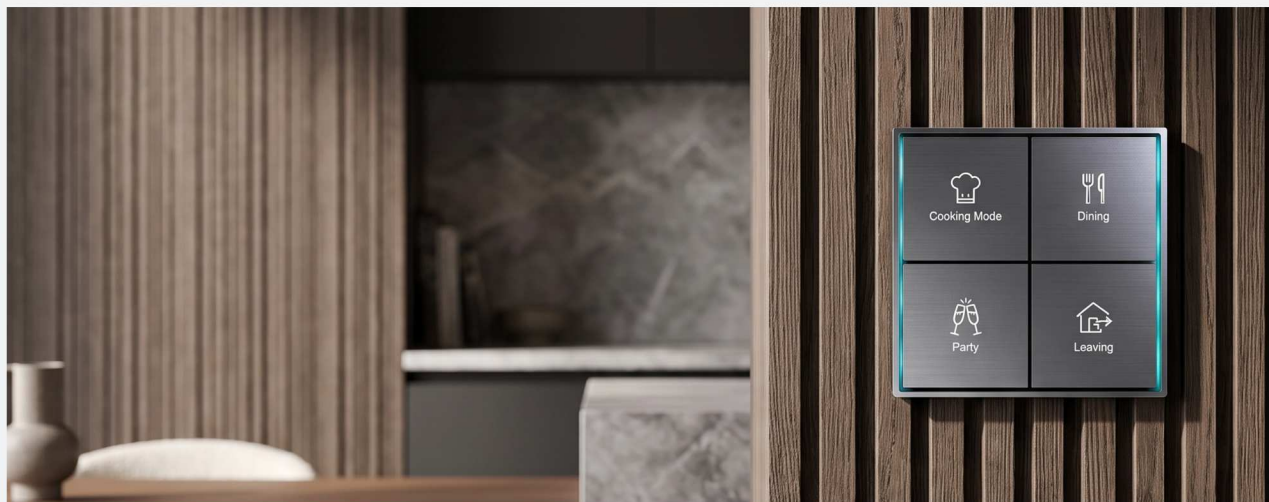

ORA

Prima

The range that gets specified floor to floor. The widest palette in the collection and two key architectures, so one visual language runs from the entrance hall to the last guest room without a change of plate.

ORA

Luce

Copper worked by hand, and FENIX® nanomaterial. Nine patinated finishes in which no two plates are alike, and a matt surface that gives almost nothing back to the light.
